WORK EXPERIENCE

Senior Frontend Developer

MySavills team

Savills UK

Remote, London

June 2022 – present

- Built micro services web apps serving over 500 real estate agents across the UK.
- Built apps to provide CRM workflows, analytics dashboards, email trackers, and more. Integrates with backend .NET services.
- We made a UI library for the company. It saved 300 hours of design work. It also made services more consistent.
- Mentored junior developers through weekly 1:1s and code reviews.
- Reviewed PRs and drove tasks to completion on 3-week sprints.

Frontend Developer

Lettings team

Reapit UK

Remote, London

2020 – 2022

- Built embedded desktop apps for over 500 real estate agents in the UK lettings division. These apps helped improve tenancy workflows.
- Built a Tenancy Progression services that automates tenant screening tasks. This service helps agents fill vacancies 50% faster.
- Built a Renewals app. It digitized manual renewal processing. This saves agents 35% of their time per renewal.
- Built Change of Sharer app which cut tenant swap processing time in by 50%.
- I used Jest, React Testing Library, and Cypress to test the core flows. This increased test coverage to over 90%.

UI / UX Frontend Developer

Core Team

Hakovo

Remote, Singapore

2018 – 2020

- Redesigned and implemented a dashboard and analytics platform for logistics operations.

UI/UX DESIGN

- Created user journey storyboards, process flows, wireframes, and interactive prototypes in Figma.
- I turned product requirements into a visual design system for web apps. This ensured that users had a consistent experience.

DEVELOPMENT

- Developed uCCH(Unified Customs Clearing House) including:
 - Smartclear: B2B solutions for managing large volumes of customs declaration. Created complex customs forms and integrated it with many government-owned APIs.
 - Smarttrace: created documents and vessel location tracking. Real-time location tracking with map, ETA timeline, email notifications, and shareable tracking link.
 - Smarttariff: created HS (Harmonized System) code recommendations powered by AI.
- Rewrite legacy code from Angular and WordPress to modern ReactJS.
- Technology used ReactJS, Remix, React Query, React Testing Library, Jest, React Hook Forms, ANTD, Material UI, and Figma.

EDUCATION

Master of Management, Atma Jaya University, Jakarta

2007 - 2010

Bachelor of Political Science, Parahyangan University, Bandung

1995 - 2001
